EDUCATION

University of Waterloo

Bachelor of Engineering in Software Engineering, Co-op

Waterloo, ON

GPA: 3.98/4.00 (93%)

- Received \$2000 *President's Scholarship*

EXPERIENCE

WATonomous, WatCloud Team

Software Engineer

Nov 2025 – Present

Waterloo, ON

- Deployed **MicroK8s** infrastructure for 250+ ML developers using **Terraform** and **Ansible** automating configuration
- Built a real-time monitoring system using **Prometheus** to track network health across a 15-node **Tailscale** mesh
- Developed responsive **Next.js** homepage with dynamic page previews, achieving 0.6s **Lighthouse** load time

Hims & Hers (prev. Livewell)

Software Engineer Intern

Jun 2025 – Sep 2025

Montreal, QC

- Built a full-stack AI chatbot helping 20,000+ patients interpret blood tests, cutting support inquiries by 26%
- Integrated **LangChain** RAG pipeline with model-based guardrails ensuring accurate and safe medical responses
- Simplifying complex medical data by building a React dashboard visualizing blood test data with **Chart.js**
- Developed **GitHub Actions** CI/CD pipelines, reducing deployment time and accelerating product iteration by 40%

Scholarship W.

Full-Stack Developer Intern

Feb 2025 – Apr 2025

Toronto, ON

- Refactored ~4,000 lines of a **Django** backend (30+ REST endpoints) and **MySQL** schema, simplifying API logic
- Increased scholarship accessibility by matching 15,000+ students to personalized opportunities through a hybrid **recommendation system** that combined collaborative and content-based filtering
- Built a multi-factor scoring system to match students with scholarships, boosting matches 17% across 1,100+ awards

PROJECTS

League of Studies | *Typescript, Supabase, React, Next.js*

[GitHub](#) | [Demo](#)

- Won **1st Place** at JACHacks, outperforming 100+ participants
- Engineered a multiplayer studying web application using Next.js, featuring death-match and cooperation modes
- Integrated Gemini 2.5 Flash for custom question generation from text/PDF to populate content automatically

Tailored | *LangChain, Playwright, AWS, Docker*

[GitHub](#) | [Demo](#)

- Built cover letter generator with **Playwright** job scraping, chat-based refinement, and LaTeX PDF compilation
- Implemented LangChain for template retrieval via **PGVector** and context-aware generation on **AWS RDS**
- Dockerized and deployed on AWS RDS; served 3,000+ cover letters at under 10 seconds per generation

SaaSript | *C language*

[GitHub](#)

- Built **SaaSript**, an interpreted language featuring a custom bytecode virtual machine in **C**
- Implemented a full **lexer**, **parser**, and **bytecode compiler** to translate high-level code into executable bytecode
- Developed custom arrays and hashmaps from scratch to support the language's runtime and VM

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, SQL, Java, Bash

Frameworks: React.js, Next.js, Node.js, Django, Express.js, Flask, PostgreSQL, MySQL

Technologies: Git, GCP, AWS, Docker, LangChain, Kubernetes, Linux Shell, MongoDB, Supabase, GraphQL, Nginx
